

# Spring outing and encountering wind power generation music

Is spring a windy season?

For wind, spring is also famously "a breezy, blossomy season," as one of my kids' favorite books, on seasons, talked about, and the data bear that out: While wind patterns vary by location and region, wind is strongest in spring for the country as a whole. Spring loves wind, and wind loves spring. (Source: US Energy Information Administration)

Does Spring Love Wind?

Spring loves wind, and wind loves spring. (Source: US Energy Information Administration) For hydropower, patterns vary by region, as with wind, and generation also depends on dam operators' decisions about when to release water and when to store it for later generation.

Who are the 'Windrush generation'?

The 'Windrush generation' includes anyone who immigrated to Britain from the Caribbean between 1948 and 1971, named after the arrival of one of the most famous ships: the Empire Windrush.

How did the Windrush generation transform the British cultural and musical scene?

The Windrush generation transformed the British cultural and musical scene after arriving in the UK 75 years ago. Picture: Getty 75 years after the Empire Windrush docked in Essex, we celebrate the lasting musical legacy of the Windrush generation, and some of its key musical figures.

Why is spring a good year for solar energy?

Sun, wind and water One obvious reason for strong spring performances is the seasonal abundance of sources that drive renewable energy generation. For solar, spring brings longer days and luscious sunlight that not only wake up the flowers, trees and birds, but also ramp up generation from solar photovoltaic (PV) panels in fields and on rooftops.

What genres did Windrush come from?

Punk rock and new wave music emerged from genres such as dub, ska, and reggae, and the mid- to late-1970s saw a ska revival in bands including The Specials and Madness. As music technology developed in leaps and bounds, electronic music genres emerged including dubstep, jungle, garage, grime, and drum and bass. Who were the musicians of Windrush?

South Africa has a generation capacity of approximately 58 GW - enough to power 26 million kettles concurrently - mostly made up of Eskom's coal-burning power plants.

These musicians are using the power of music to inspire people to take action on climate change. Stood beneath towering wind turbines in Cornwall, an orchestra gave a performance of ...
