Energy plays an important and underrecognized role in the dynamics of climate, security, peace, and conflict in Mali, one of the least electrified countries in the world. MINUSMA's choices around its energy practices could support the wider international strategy for peace and development in Mali

A recent report by IRENA provides insights into Mali's potential for large-scale solar photovoltaic (PV) and onshore wind projects. The analysis identifies zones in Mali that ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

According to the International Renewable Energy Agency (IRENA), Mali boasts significant solar power potential, particularly in its northern regions, where annual sunshine hours exceed 3,000 hours. This abundant sunlight provides a strong natural foundation for the implementation of solar energy projects. Despite this vast potential, Mali's renewable energy market is still in its early ...
