

Store energy collected by solar cells Latvia

In May, Latvian renewable energy developer PurpleGreen Energy P announced its plans to build a 400 MW solar power plant in Balvi, in the northern Latgale ...

Clean energy investment company Niam Infrastructure and Estonian renewable power developer Evecon have announced plans to build a new solar-plus-storage portfolio in ...

The amount of solar electricity produced and transferred to the grid in Latvia has tripled over the past year, according to the electricity market review prepared by the Latvian transmission system operator JSC "High Voltage Network" (Augstsprieguma tīkls, AST) on ...

European Energy, a global leader in renewable energy development, is ready to start construction of its first solar park in Latvia. This project, spanning 138 hectares in ...

ST Board Chairman Sandis Jansons said that solar power has been a notable addition to the country's total energy portfolio in recent years - solar panels generated more than 128 gigawatt hours (GWh) of electricity in 2023. In Latvia's total electricity production balance, it is still a small part - about 2%.

The amount of solar electricity produced and transferred to the grid in Latvia has tripled over the past year, according to the electricity market review prepared by the Latvian ...

This new energy storage system has a capacity of 20 MWh, enabling the park to store surplus energy generated during periods of high wind and supply it back to the grid when needed. The project represents a EUR7 million investment, underscoring Utilitas Wind's commitment to advancing sustainable energy solutions in Latvia.

Hoymiles, as a key technology supplier, played a pivotal role in the project. Managed by Utilitas, Latvia's largest wind energy producer, this project combines wind energy generation with advanced storage capabilities, setting a new standard for renewable energy infrastructure in the country.

Hoymiles, as a key technology supplier, played a pivotal role in the project. Managed by Utilitas, Latvia's largest wind energy producer, this project combines wind energy ...

Niam Infrastructure and Evecon have partnered to build up to 84 MWp of solar power and 26 MW of energy storage across 11 sites in Latvia, marking a significant investment in the country's renewable energy sector.

ST Board Chairman Sandis Jansons said that solar power has been a notable addition to the country's total

energy portfolio in recent years - solar panels generated more ...

In May, Latvian renewable energy developer PurpleGreen Energy P announced its plans to build a 400 MW solar power plant in Balvi, in the northern Latgale region near the Russian border.

European Energy, a global leader in renewable energy development, is ready to start construction of its first solar park in Latvia. This project, spanning 138 hectares in Targale, Ventspils county, will boast a substantial capacity of 148 MW, making it one of the largest solar parks in the country.

Clean energy investment company Niam Infrastructure and Estonian renewable power developer Evecon have announced plans to build a new solar-plus-storage portfolio in Latvia.

Niam Infrastructure and Evecon have partnered to build up to 84 MWp of solar power and 26 MW of energy storage across 11 sites in Latvia, marking a significant ...
