

Supreme solar Tokelau

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

Who will install a new solar system in Tokelau?

Jointly funded by the governments of Tokelau and New Zealand, the \$NZ9 million (\$USD5.7m) system will be installed by New Zealand company Vector PowerSmart. Tokelau's existing solar system was eight years old and in need of upgrading because of increasing demand for electricity and wear and tear from the harsh marine environment, it said.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world, and together they are capable of providing 150% of current electricity demand in Tokelau, a much higher amount than the 90% that was originally planned for.

Why did Tokelau switch to solar?

Yet despite the challenges involved in installing comprehensive solar systems in such a remote location, switching to solar was absolutely crucial for the tiny collection of islands. "Tokelau's atolls are low-lying and especially susceptible to the adverse effects of climate change," Mayhew stressed.

Why should you choose Supreme solar?

Power your home with New Zealand's abundant sunshine! Slash electricity bills and embrace clean energy with tailor-made residential solar solutions. At Supreme Solar, we are dedicated to providing sustainable and cost-effective solar energy solutions to residential and commercial clients across the Waikato, Bay of Plenty, and Auckland regions.

How far is Tokelau from Samoa?

But it hasn't been an easy task. Tokelau is an extremely remote nation - the closest atoll is around 500km north of Samoa, there are no airstrips or wharves and the only access is a long boat trip from Samoa that ends outside the reefs, where a landing barge can deliver passengers and equipment to shore.

A third New Zealand-funded PV system has been completed in Tokelau which means that the New Zealand-owned territory now has the capabilities to be powered by 100% solar energy, Foreign Affairs...
