

Sweden waste battery storage container

What kind of batteries are collected in Sweden?

Of all the batteries that are collected in Sweden, the largest part is Alkaline, as much as 75%. Alkaline batteries are the most common single-use batteries - the ones you would put in your smoke detector, a remote control or in your children's toys.

Is Axpo launching a large-scale battery storage facility in Sweden?

12.02.2024 - The commissioning of Axpo's first large-scale battery storage facility in Sweden, announced today, marks the latest milestone in the expansion of its battery business. The 20MW/20MWh plant, connected to the electricity grid by local energy company Landskrona Energi, follows several projects in Switzerland and Europe.

Where is battery storage located?

The battery storage is located near a substation and is charged when the balance in the electrical system allows it and discharged when demand is high. Our battery storage consists of containers with approximately 180 batteries per container. The batteries used are lithium batteries, just like most electric vehicle batteries.

Where is Axpo battery storage located?

Following the expansion of these activities to a number of markets across Europe, Axpo has now commissioned its first large-scale battery storage facility in Sweden, specifically in Landskrona in the south of the country. Meanwhile, the company continues to develop its battery storage systems business internationally.

How do you dispose of hazardous waste in Sweden?

For their proper disposal, Sweden has designated collection points and specialized hazardous waste facilities. To ensure the safety of both the environment and residents, one can find detailed guidelines and collection points on the Swedish Environmental Protection Agency's website. Adjusting to a new country's recycling protocols can be daunting.

We deliver battery energy storage systems (BESS) that reduce overall operating costs and shrink the carbon footprint. BESS ensures an uninterrupted supply of power under any ...
