

# Togo farasis energy

Will Togg use batteries from Farasis Energy?

Togg will rely on cells from Farasis Energy. The Chinese company will also act as Togg's partner for the assembly of the batteries. Initially, it was said that the cells would be delivered to Turkey from Farasis' planned factory in Bitterfeld (Saxony-Anhalt).

Who is farasis energy?

This approach is a natural extension of Siro's strategy of developing and producing high-performance, state-of-the-art lithium-ion cells in Turkey." Farasis Energy is a leading developer and manufacturer of high-performance lithium-ion battery technology and pouch cells for electric mobility and other sustainable power storage solutions.

Why did Siro invest in farasis?

Dr. Keith Kepler, Vice Chairman of Siro and Co-founder of Farasis said: "This investment underlines Farasis' global growth and places emphasis on the importance to switch to a fossil free form of transportation. We are proud to be part of this joint venture, which will be shaping the future of mobility."

Siro, a joint venture between Farasis Energy, a leading developer and manufacturer of high-performance lithium-ion battery technology, and Turkish global mobility technology brand Togg, aims for a production ...

Farasis is partnering with TOGG, a European OEM developing native electric vehicles and e-mobility ecosystem, for the use of Farasis battery cells in the full range of TOGG products. According to the agreement, battery cells will be provided by Farasis and the battery modules and packs will be jointly developed and produced in Turkey.

Farasis Energy, one of the leading suppliers of innovative lithium-ion-based batteries, and the global UseCase Mobility(TM) provider TOGG have sealed a joint venture to develop and produce energy storage solutions for e-mobility and beyond.

Siro, a joint venture between Farasis Energy and Turkish global mobility technology brand Togg (earlier post), has started production at the new Gemlik site in Turkey on 31 March. The plant, with a capacity of 3 GWh/annum, will produce battery modules and packs based on Farasis Energy's high-performance lithium-ion technology....

Turkey's Automobile Joint Venture Group (TOGG), which is producing the country's first fully indigenous electric car, signed a letter of intent with leading lithium-ion (li-ion) battery producing company Farasis Energy for the production and use of battery cells in the full range of TOGG products, Menaf reports.

Battery company Farasis Energy and mobility provider, TOGG, have sealed a joint venture deal to develop and produce energy storage solutions for e-mobility and beyond. ...

Siro, a joint venture between Farasis Energy, a leading developer and manufacturer of high-performance lithium-ion battery technology, and Turkish global mobility technology brand Togg, aims for a production capacity of 20 GWh/a.
