(Togo First) - The Kekeli Efficient Power thermal plan, located in Lomé, should be operational by the end of 2020. In detail, the first operational phase was launched last June. Upon its completion, expected in Q3 2020, the plant should have a production capacity of 47 MW using a gas turbine.

Siemens Energy has successfully delivered a SGT-800 gas turbine to the site of Kékéli Efficient Power S.A., as part of their development of the 65 megawatt (MW) combined cycle power plant in the Republic of Togo, supporting improved access to reliable and affordable energy in the West African nation.

Kékéli Thermal Power Station, also Kékéli Efficient Power Station, is a 65 MW (87,000 hp) natural gas-fired thermal power plant located in the city of Lomé, the capital of Togo. [1]

Kékéli Efficient Power in Togo West Africa is setting a new standard for energy production in the region. As the demand for reliable and sustainable power grows, this ...

The KEKELI EFFICIENT POWER PLANT Combined Cycle Power Plant will help meet almost 40% of the Republic of Togo's electricity demand. Located in the capital Lomé, the 65 MW ...

Siemens Energy has successfully delivered a SGT-800 gas turbine to the site of Kékéli Efficient Power S.A., as part of their development of the 65 megawatt (MW) combined ...

The Eranove Group has just put into operation the gas turbine of its Kékéli Efficient Power plant located in Lomé, Togo. With an expected capacity of 65 MW, the ...

Siemens Energy has successfully delivered a SGT-800 gas turbine for the 65MW Kékéli combined-cycle gas turbine (CCGT) power plant in the port area of Lomé. The turbine was built by the German energy engineering group in Finspång, Sweden, and shipped to Togo to form the core of the future CCGT plant, the company announced on 30 September.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of ...

Siemens Energy has successfully delivered a SGT-800 gas turbine for the 65MW Kékéli combined-cycle gas turbine (CCGT) power plant in the port area of Lomé. The ...

(Togo First) - A loan agreement was signed yesterday for the construction of a 65MW combined-cycle Kékéli Efficient power plant. The document was inked in Lomé by the ...

TSK"s Kékeli project in Togo drives sub-Saharan Africa towards energy efficiency The KEKELI EFFICIENT POWER PLANT 65 MW Combined Cycle Power Plant will provide energy security ...

Kékéli Efficient Power in Togo West Africa is setting a new standard for energy production in the region. As the demand for reliable and sustainable power grows, this innovative project promises to deliver efficient and environmentally friendly energy solutions.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

The Eranove Group has just put into operation the gas turbine of its Kékéli Efficient Power plant located in Lomé, Togo. With an expected capacity of 65 MW, the installation has characteristics that make it less polluting than conventional thermal power plants.
