Demand for electricity in Togo has increased rapidly in line with economic growth, but energy production capacity remains insufficient to trigger structural transformation and private sector development.

5 ???· This was during the West Africa Energy Cooperation Summit (WA-ECS) held from December 3 to 5. In her address, PM Dogbé highlighted Togo's commitment to renewable energy development through ambitious projects. Some of the country's flagship renewable energy projects include Blitta's PV plant, one of the largest in West Africa.

The country has a relatively diversified energy mix and more than 13% of its final energy consumption comes from renewable supplies of energy, mainly hydropower. Less than half of the Togolese population has access to electricity.
