

# U S Virgin Islands solar electricity system

What is the Virgin Islands Energy Office?

The Virgin Islands Energy Office (VIEO) is focused on promoting sustainable energy policies in the Virgin Islands through clean energy production and distribution, energy efficiency, transportation, and energy consumption. It achieves this through outreach, financial incentives, training, and technical assistance.

How much of the US Virgin Islands' electricity is generated by solar?

In 2020, about 20% of the US Virgin Islands' electricity was generated by renewables. Approximately 80% of this renewable capacity came from customer-installed, small rooftop solar panel systems, while the remaining 20% came from utility-scale solar energy facilities.

How many electricity grids does the USVI have?

The USVI has two separate electricity grids. Each grid is located on a different main island and is managed by WAPA, an independent governmental agency.

What is the cost of electricity in the USVI?

The electricity rates in the USVI are \$0.47 per kilowatt-hour (kWh). This is higher than the Caribbean regional average of \$0.33/kWh.

What is ProSolar Systems in solar energy?

ProSolar Systems is an award-winning solar energy company serving The U.S. Virgin Islands. We offer a variety of renewable energy products for every home, every business, and every budget.

Do St Thomas and St Croix have electricity?

As of late 2014, both St. Thomas and St. John were served by one electrical grid run by the Virgin Island Water and Power Authority (WAPA). St. Croix, however, has a separate electrical grid in the WAPA service area. More than 1,000 distributed renewable energy systems were connected to the WAPA grid.

The U.S. Virgin Islands' Clean Energy Goals: o Reduce fossil fuel-based energy consumption 60% by 2025 o Generate 30% of peak capacity from renewables by 2025.
