Why should you go solar in Vanuatu?

In an era of climate change and unsustainable environmental practices, by embracing solar power Vanuatu can forge ahead with providing affordable, clean energy for all its people. More than ever, a great time to go solar!! Reduce your electricity costs.

How many solar installations are there in Efata (Vanuatu)?

The total installed capacity is 6042 kW, generated by 5 solar PV installations and 1 on-shore wind farm (installed in 4 phases). This configuration of installations was run through 3 simulated weather years to capture year on year variability. Figure 23: Existing wind and solar installations in Efata (Vanuatu) as of 2021.

Does uncertainty calibration matter for solar power simulations in Vanuatu?

Table 2: Summary of uncertainty calibration for solar power simulations in Efata, Vanuatu. Since only monthly production totals were available for wind it was not possible to test the uncertainty calibration due to having an insufficient number of samples to make a meaningful comparison.

How many islands are in Vanuatu?

Vanuatu is an archipelago consisting of 82 islands, with 65 inhabited. With the remoteness of the islands and limited access to centralised utilities, PCS also offers self supporting products suitable for the Vanuatu environment, including solar showers, hand spears, personal solar lighting and Lifestraw water filters.

What are the requirements for a Vanuatu solar and wind assessment?

4.2. Specific requirements in Vanuatu Global resolution data (30 x 30 km) for a national assessment for combined solar, wind and wave. Intermediate resolution (5km x 5km) for Vanuatu North and Vanuatu South regions for more detailed assessments of combined solar and wind.
