

Vietnam needs to unlock its renewable-energy development as quickly as possible to reach the government's commitment to net zero by 2050 and the bold PDP8 goals, which aim for wind, solar, and other renewable ...

Novus Earth, which was founded in Calgary in 2021 and employs a team of 12 former oil and gas professionals, is in the process of applying AGS to heat Latitude 53, a 20-acre greenhouse in Hinton...

Vietnam has shown the world its capability to accelerate clean energy solutions, with the highest installed capacity of solar power in Southeast Asia and the government's commitment to boosting ...

Agriculture company Freshbay announced this month it has reached a \$29,000,000 agreement with Novus Earth to move forward on a geothermal-controlled project near Hinton. The collaboration also involves Affinor Growers, which signed its agreement with Freshbay three weeks ago.

The company harnesses geothermal energy to produce renewable baseload power and heat and provides a zero-carbon energy remedy to cost-effectively grow food through vertical aquaponics, enabling industries to utilize decarbonized technologies that enable sustainable stewardship of the earth's resources.

By combining GMK Energy's operational expertise in implementing AGS for direct solutions together with Novus Earth's innovative AGS technology, we aim to make significant advancements in ...

Vietnam has achieved a renewable energy revolution over recent years, with its electricity generation from solar and wind reaching 10.5 per cent and 1 per cent respectively as of 2021. This, combined with the country's ...

Our team at Novus Earth Energy celebrates the resilience and diversity of First Nations, Inuit and Métis people across Canada.

Vietnam utilizes four main sources of renewable energy: hydroelectricity, wind power, solar power and biomass. [1] At the end of 2018, hydropower was the largest source of renewable energy, contributing about 40% to the total national electricity capacity. [2]

Vietnam utilizes four main sources of renewable energy: hydroelectricity, wind power, solar power and biomass. [1] At the end of 2018, hydropower was the largest source of renewable energy, ...
