

Weld your own solar mount

How do I Mount my solar panels?

Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the EcoFlow Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

How much does a solar panel mounting system cost?

As a guide, this mounting system is £200+VAT/panel. A heavily ballasted plastic bin is the best way we've found of describing these. They allow very flexible placement of solar PV panels and if you ever need to move them you can just unplug the panels and move the bins.

Where can I mount solar panels?

You can always mount them on the ground. Often used by commercial solar farm arrays. Metal frames come in a variety of layouts, two panels high in landscape, single panels in portrait etc etc, pretty much any set up you like is available. Usually set on concrete bases, these frames can help you make use of some dead ground.
