

What are you afraid of with solar panels

Why do people worry about solar panels?

Some are put off by uncertainty about costs, others believe the installation will be disruptive and many worry that solar panels will be tricky to maintain. These were among the most common questions and concerns people had about getting solar panels, according to a government report in July 2021.

Why do people install solar panels?

Solar panels are often marketed as a way to save money on electricity- and sometimes as a way to make money too. This is because you can get paid for the electricity they produce that you don't use. Of course, many people install solar panels for other reasons.

Are solar panels toxic?

As with most electronic items, solar panels contain compounds that can be toxic if released into the environment. That's why it is important to buy from reputable manufacturers and ensure at the end of their life (which could be 40 years or more) they are recycled correctly.

What happens if your solar energy system doesn't supply enough electricity?

This means that if your solar energy system doesn't supply enough electricity, the grid will supply the rest.
Myth #2: Solar panels aren't efficient enough.

Are solar panels reflective?

The solar industry has developed high-tech, anti-reflective coatings and ultra-transparent glass to improve panel efficiency and, in fact, solar panels are less reflective than many common building features, such as windows. When it's not sunny, how will we have enough clean energy to power the country?
