

What solar power means to Dubai

How much solar power capacity does Dubai have?

Dubai currently has an installed solar power production capacity of nearly 2,700 megawatts (MW). This raises clean energy's share in Dubai's electricity production to over 16 per cent of the total capacity. In 2020, Dubai surpassed its 7 per cent solar energy target, reaching an impressive nine per cent.

Does the United Arab Emirates have solar power?

While being a major oil producing country, the United Arab Emirates (UAE) has taken steps to introduce solar power on a large scale. However, solar power still accounts for a small share of energy production in the country.

How sustainable is Dubai solar park?

It has a planned production capacity of 5,000 MW by 2030, with investments totalling AED 50 billion. When completed, it will save over 6.5 million tons of carbon emissions annually. The Mohammed bin Rashid Al Maktoum Solar Park contributed to DEWA winning the Best Sustainable Project of the Year in the UAE at the 2014 MEED Quality Awards.

Is Dubai making significant strides in the solar sector?

Dubai is making substantial strides in the solar sector. The Mohammed bin Rashid Al Maktoum Solar Park is a brilliant showcase of Dubai's massive progress in this area. DEWA supports strategies that aim to provide 100% of energy production from clean sources.

What is Dubai's solar energy initiative?

Launching the initiative implements council resolution number 46 of 2014, issued by HH Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum, Crown Prince of Dubai and Chairman of the Dubai Executive Council, to regulate the connection of solar energy to Dubai's power grid.

What percentage of UAE electricity is generated by solar power?

Solar energy provided 4.5% of national electricity generation in the UAE in 2022, compared to 0.3% in 2014. In 2013, the Shams solar power station, a 100- megawatt (MW) concentrated solar power (CSP) plant near Abu Dhabi became operational.
