

X4 condensate storage Djibouti

???(58)??? ?????????????? ?Cybo????????????? ?????

Once PHQ condensate storage is full, leave the Raleighs behind and teleport it out of Leap of Faith and somewhere within range of your Windfall trading station. Use as many ...

The station in LoF spits out Condensate. The Astrid can carry something about 400+ Condensate. The storage module can store a good amount of it. You're supposed to ...

The station in LoF spits out Condensate. The Astrid can carry something about 400+ Condensate. The storage module can store a good amount of it. You're supposed to jump into LoF once an hour to get 400+ Condensate, transport it back and store it until it is sold.

They aren't dependent on the condensate for survival now. The monopoly is already broken. The resources in Avarice, such as they are, can be accessed from Windfall ...

The requirement was for a ship capable of transporting a new type of material: Condensate. The well-funded Northriver Company, working with the Aurora engineers, introduced their ...

The blueprint you steal is for a condensate storage module (under the storage section in the build menu). You don't actually produce the condensate, you merely collect it (manually) from the ancient object that produces it.

The requirement was for a ship capable of transporting a new type of material: Condensate. The well-funded Northriver Company, working with Aurora engineers, introduced their prototype storage system into the more robust framework of the ...

X4 condensate storage Djibouti

Put simply, for each item the station's production/habitats use or generate, a fraction of the overall storage is partitioned for each item based seemingly on production rates. ...

Condensate Storage is only obtained in the Avarice mission line by selecting a specific choice. It is also worth noting that the Protectyon Shield Generator is a storage module by itself, and can store 5 Protectyon.

In short: Why do we have three storage types in player owned stations? X4: Let's do this! (ASUS Sabertooth X99S; i7 5930@3.5; 24GB RAM; RX 580; playing latest ...

Put simply, for each item the station's production/habitats use or generate, a fraction of the overall storage is partitioned for each item based seemingly on production rates. These are hard limits; the station will never accept resources beyond this partition.
