

Yemen energy storage system

Between 2018 and 2022, the World Bank's Yemen Emergency Electricity Access Project (YEEAP), sought to leverage solar energy facilities to improve access to electricity in rural and peri-urban areas.

GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

Yemen energy storage system

Yemen is dealing with the dilemma of energy networks that are unstable and indefensible. Due to the fighting, certain energy systems have been completely damaged, while others have been partially devastated, resulting in a drop in generation capacity and even fuel delivery challenges from power generation plants.
